PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience in data analytics, Power BI dashboard development, SQL querying, IT support, website management, and administrative operations. Proficient in Excel, Power BI, SQL, Google Sheets, and MIS reporting. Proven ability to manage websites, resolve technical issues, handle documentation, coordinate teams, and support HR and admin functions across diverse organisational environments.

CORE COMPETENCIES

Data & Analytics

- Microsoft Excel (Pivot Tables, Charts, Formulas)
- Power BI & DAX (Dashboard Development, KPI Reports)
- SQL & PostgreSQL (Queries, Joins, CTEs)
- Google Sheets & BigQuery
- Looker Studio (Data Visualisation & Reporting)
- Data Cleaning, MIS & Business Intelligence
- Time-Series Forecasting & Trend Analysis
- Data Storytelling & Insight Communication

IT, Web & Technical

- WordPress (Website Build, Themes, Plugins)
- HTML, CSS, JavaScript, PHP
- IT Support & Hardware/Software Troubleshooting
- Website Maintenance & Performance Optimisation
- Google Classroom, Zoom, Google Meet
- Basic Networking & IT Operations

Administrative & Professional

- Office Administration & Coordination
- HR Support (Recruitment, CV Screening, Payroll)
- Documentation, Records & Filing Management
- Stakeholder Communication & Reporting
- Team Collaboration & Time Management
- Analytical Thinking & Problem Solving

PROFESSIONAL EXPERIENCE

Program Officer — IT & Technical Support

Dec 2023 – May 2024

National Anti-Tuberculosis Association of Bangladesh (NATAB), Dhaka

- Solely designed, built, and deployed the organisation's full website using WordPress — managed UI layout, content structure, plugin integration, and performance optimisation with no external developer support.
- Handled all IT support including hardware, software, and network troubleshooting; managed website uptime and content updates to ensure smooth daily operations.
- Coordinated inter-departmental meetings, field visits, and stakeholder communications; prepared official reports, documentation, and administrative records.

Administrative & Academic Support Officer

Aug 2025 – Oct 2025

Newcastle International School, Dhaka

- Maintained attendance, leave, and academic records for 500+ students and 80+ teaching staff with full accuracy and confidentiality.
- Assisted in monthly payroll preparation and salary documentation; streamlined reporting workflows, reducing manual reporting time by approximately 30%.
- Supported the full recruitment cycle — CV screening, candidate shortlisting, interview scheduling, and coordination.

Teaching & Academic Support (Part-time)

2020 – 2023

Various Institutions, Dhaka

- Taught Mathematics, Science, and ICT to Class 5–12 students (Bangla & English medium); designed lesson plans, conducted model tests, and tracked individual student performance.
- Students achieved 1st position in the Class 5 Government Scholarship Examination (Kadamtali & Shyampur Thana) through structured preparation and targeted assessment.

KEY ACHIEVEMENTS

- **IT & Web [NATAB]:** Sole developer and IT manager — built and launched the full organisational website using WordPress independently, delivering UI, structure, plugins, and optimisation with zero external support while managing all daily IT operations simultaneously.
- **Administration [Newcastle School]:** Managed records for 500+ students and 80+ staff; streamlined attendance, payroll assistance, and recruitment coordination — reducing manual reporting time by ~30% within a 3-month contract.
- **Academic [Teaching]:** Students achieved 1st position in the Class 5 Government Scholarship Examination across Kadamtali & Shyampur Thana through structured lessons and consistent performance tracking.

PROJECTS

SuperStore Sales Analysis

Power BI, Excel, DAX | github.com/mohammad-rabius-sani/SuperStore-Sales-Data

Analysed 5,902 sales records to identify regional performance gaps, customer trends, and profit drivers. Built an interactive multi-page Power BI dashboard with DAX calculated columns, slicers, and time-series forecasting. Identified that Corporate customers drove 35% of total revenue at the lowest return rate.

Music Store Data Analysis

SQL, PostgreSQL | github.com/mohammad-rabius-sani/Music-Store-Data-Analysis

Wrote 11 structured SQL queries using JOINS, GROUP BY, subqueries, CTEs, and window functions to analyse customer invoices, artist performance, and music genre popularity across countries. Identified top customers per country, highest-revenue city, and dominant genres by region.

Bike Sales Analysis

Microsoft Excel | github.com/mohammad-rabius-sani/Bike-Sales-Analysis

Cleaned and normalised a multi-sheet sales dataset — removed duplicates, fixed inconsistencies, and built calculated columns. Created pivot tables and an interactive dashboard with bar charts, line graphs, and pie charts to track sales by region, category, and customer segment.

EDUCATION

Bachelor of Science (BSc) in Software Engineering

2022

Daffodil International University (DIU), Dhaka, Bangladesh

TRAINING & CERTIFICATIONS

- Data Analytics Career Bootcamp — Human Development Network Bangladesh (HDNB)
- SQL & PostgreSQL for Beginners — Udemy
- UI/UX Design — Pencilbox Training Institute
- WordPress, Web Design & E-commerce Master Course — Mexemy
